

Lends Testnet Program

We're excited to have you on board! This is your chance to be a part of the future of decentralized lending and make a real impact on the development of our platform. By joining our testnet, you'll be able to earn exclusive rewards for your contributions. We are reserving \$2,000 in LENDS tokens based on the following reward structure:

- 🏆 \$500: First place (1 winner)
- 🥈 \$300: Second place (2 winners, \$300 each)
- 🥉 \$150: Third place (3 winners, \$150 each)
- 🏆 \$50: Honorable mentions (9 winners, \$50 each)

How can you win?

We've designed the beta testing to be as simple as possible for you to win. Participants will be assigned a scoring system based on their support. You'll be able to score multiple points by engaging in various activities that will help us test and improve the protocol. These include using our P2P features and engaging with the community through Discord discussions. You'll also be able to earn extra points by giving your feedback on calls with the team, contributing valuable content, finding and reporting bugs, and much more.

Basic activities

Test the System

- **P2P Feedback:** Use Lends' P2P feature to lend and borrow assets and share your feedback on your experience. Your insights will help us fine-tune the user interface and overall functionality.
 - **Activity Verification:** Provide your wallet address so we can monitor your activity and ensure you're engaging with the protocol. This helps us gather accurate data on user interactions and system performance.

Participate in Discord Discussions

- **Discord Engagement:** Join the conversations on our Discord server and contribute meaningfully. We will manually score your contributions based on quality (and not only the quantity of contributions), ensuring that insightful and constructive participation is recognized and rewarded.
 - **Activity Verification:** Provide your Discord username so we can monitor your activity.

Find and Report Bugs

- **Bug Bounty:** Help us identify and fix bugs by reporting any issues you encounter. This ensures the protocol is robust and reliable before the mainnet launch.

Extra points

Amplify Lends' social reach

- **Social Media Engagement:** Retweet our posts and spread the word about Lends.
 - **Activity Verification:** Provide your Twitter handle so we can verify your activity. Your support helps increase our visibility and attract more participants.
- **Community Outreach:** Connect us with online communities and Key Opinion Leaders (KOLs) to facilitate more AMAs. This will help us reach a wider audience and gather diverse opinions on our protocol.
 - **What We Are Looking For:** Connections within Ethereum, BNB, and Arbitrum communities.
 - **Activity Verification:** Mention your wallet and Discord username when you connect us with discussion groups and KOLs.

Contribute with Content (following Ambassador guidelines)

- **Create YouTube Videos:** Produce quality videos about Lends and share them on YouTube.
- **Write How-to Threads:** Craft detailed threads on social media about your experience with Lends and DeFi strategies. Share innovative strategies that leverage Lends' features.
- **Host AMAs or Translate Content:** Organize Ask Me Anything sessions or translate and distribute content to reach non-English-speaking communities.
 - **Activity Verification:** Send us your content and mention your wallet and Discord username.

Even more extra points

Jump on a call with us

- **Qualify on Discord:** Show your commitment and knowledge through quality participation on Discord.
 - If you stand out, we'll invite you to a call with our team.
- **Share Your Insights:** During the call, provide your testimonial, share suggestions, and discuss potential improvements. This direct feedback is invaluable to us.

We wish you success in the program!

The Lends team
